Dear Colleagues:

We are pleased to inform you that Uruguay has been appointed to host the upcoming 10 World Congress of Perinatal Medicine scheduled to take place on November 8 – 11, 2011 in Punta del Este, Uruguay.

The organization of this event poses a great challenge for the Organizers Societes, as well as for our country, since it will gather participants coming from four continents. There is no doubt this congress will provide an opportunity to bring the attention of the perinatal community to South America, to one of the places that gave birth to Perinatal Medicine.

The Congress will be held in the city of Punta del Este, one of the most exclusive seaside resorts in the Southern Atlantic, 130 Km from Montevideo, 1 hour flight from Buenos Aires, and within easy reach of the most significant tourist destinations in South America.

The interesting topics included in the program and the venue chosen, will contribute to the success we all wish for this event, with an anticipated attendance of over 1.500 participants.

The Exhibition is an excellent opportunity to promote your products, especially during Coffee Breaks.

The programmed activities during the Congress will be in the form of Conferences, Round Tables, etc. and there will also be time to organize Satellite Symposia sponsored by the industry with the purpose of publicizing your products, equipment or services.

Attached, you will find a list of options for you consideration. We are certain your participation will bring excellent benefits to your business.

Our administrative staff is available to provide further information or any explanation you may require.

We hope you will be a part of this event!

Sincerely,

Prof. Justo Alonso
President

Perinatology in Uruguay

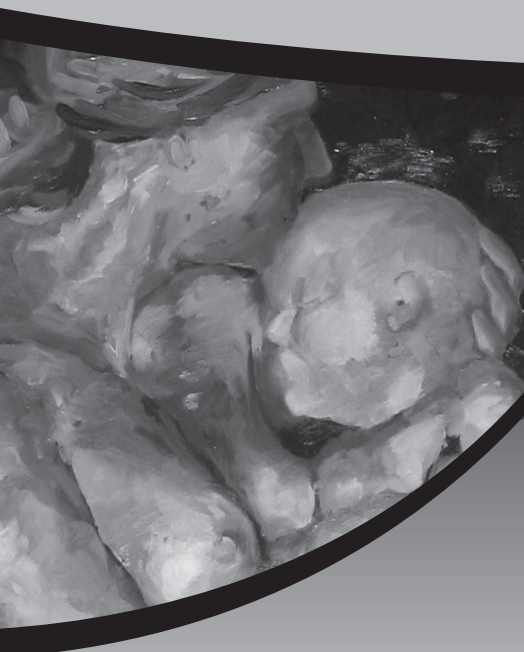

Uruguay has played a key role in the development of Perinatal Medicine, thanks in part to the major contributions in the field started by **Prof. Roberto Caldeyro-Barcia and Hermógenes Alvarez**.

It was Prof. Caldeyro-Barcia and Dr. Hermógenes Alvarez who established a tracing system to monitor intrauterine amniotic pressure, which made it possible to analyze and define uterus contractility during pregnancy and childbirth, measuring the intensity and frequency of contractions and the uterine tone. This research led to the worldwide use of "Montevideo Units" to quantify uterine activity. Caldeyro-Barcia and Dr. Hermógenes Alvarez also developed a method to measure the effect of the uterine contractions on fetal heart rate, which would later become the basis of fetal monitoring, commonly used globally to monitor the fetus's response to contractions during labour and to prevent any neurological damage resulting from a lack of oxygen.

In 1970, the Pan American Health Organization created the first Latin American Center of Perinatology (CLAP) in Montevideo, appointing Prof. Caldeyro-Barcia as its director. This became a training and reference center for professionals in Latin America and elsewhere, since it provided training to doctors from the United States, Germany, Japan, Sweden, Spain, Switzerland, as well as a vast number of Latin Americans, many of whom are today faculty members in their countries of origin.

The World Association for Perinatal Medicine was created in Tokyo in 1991, during the first world congress of this specialty, having Dr. Caldeyro-Barcia as one of its founders and main supporters.

Twenty years after this first meeting, Uruguay will host the **10th WORLD CONGRESS OF PERINATAL MEDICINE**, where fundamental pioneering work started!

08 - 11 November, 2011
Conrad Resort & Casino
Punta del Este - Uruguay

MAIN TOPICS

Official Topics

- Advances in Multiple Pregnancy
- Perinatal Management of Extreme Prematurity
- Update in Perinatal Infections, including Nosocomial Infections
- Nutrition: Maternal, fetal y neonatal
- Congenital Defects: Genomics, proteomics and epigenetics.
- Ethical aspects of perinatal medicine
- Perinatal asphyxia
- History of Perinatology
- Recent advances in perinatal ultrasound

Other Topics

- Birthing Rooms and Birthing Options
- Milk banking: a perinatal task
- New trends in preterm feeding
- Newborn screening for congenital defects
- Congenital Defects: what is new?
- Perinatal Death: epidemiology and etiology including palliative care and bereavement.
- Fetal Asphyxia during labour and neonatal asphyxia: prevention, diagnosis and treatment (including hypothermia)
- Perinatal Effects of Problematic Drug Consumption
- History of Perinatal Medicine
- Perinatal Pain (mother, fetus and newborn)
- Vertically Transmitted Diseases in Perinatology
- Recent Advances in Intrapartum Fetal Surveillance
- Communicational issues between parents and perinatal teams
- Screening programs in the neonatal period
- Respiratory support in NICUS including surfactant
- What is new in Bronchopulmonary Dysplasia
- Late preterm: a new epidemiological situation
- Cost-Benefit Ratio of Interventions in Perinatal Medicine in different countries
- Influence of Nutrition and Enviroment on Perinatal Development
- Room air resuscitation
- Neonatal Surgery: A perinatal task
- What is new in Perinatal Ultrasound?
- Recent advances in Imaging in Perinatal Medicine
